7. Course description

This English course gives exposure to the language forms and use in context. While it offers four-skill practices, an emphasis is placed on reading and listening. Learners are encouraged to participate in activities to gain a good understanding of structural and lexical knowledge, which will be a foundation for their English language studies at higher levels.

7. Course description

At this level of the English course, more depth is given to the language form and function. Some of the structures that the students have been exposed to in the previous courses appear in more complicated situations as they are mixed with the other structures in less modified contexts. Colloquial phrases add to the complexity of the reading and listening. This is to prepare the students for real-world communication.

8. Hours per semester

In-class	Extra (out-of-class lesson)	Self-study
2 hours/wk	-	Not required
